

CONTENTS IN DETAIL

INTRODUCTION	1
On Programming	2
Why Language Matters	3
What Is JavaScript?	5
Code, and What to Do with It	6
Overview of This Book	7
Typographic Conventions	8

PART I LANGUAGE

1		
VALUES, TYPES, AND OPERATORS		11
Values	12	
Numbers	12	
Arithmetic	13	
Special Numbers	14	
Strings	14	
Unary Operators	15	
Boolean Values	16	
Comparison	16	
Logical Operators	17	
Empty Values	18	
Automatic Type Conversion	18	
Short-Circuiting of Logical Operators	19	
Summary	20	
2		
PROGRAM STRUCTURE		23
Expressions and Statements	23	
Bindings	24	
Binding Names	26	
The Environment	26	
Functions	26	
The console.log Function	27	
Return Values	27	
Control Flow	28	

Conditional Execution	28
while and do Loops	30
Indenting Code	31
for Loops	32
Breaking Out of a Loop	33
Updating Bindings Succinctly	33
Dispatching on a Value with switch	34
Capitalization	35
Comments	35
Summary	36
Exercises	36
Looping a Triangle	36
FizzBuzz	37
Chessboard	37

3 FUNCTIONS 39

Defining a Function	39
Bindings and Scopes	40
Nested Scope	41
Functions as Values	42
Declaration Notation	42
Arrow Functions	43
The Call Stack	44
Optional Arguments	45
Closure	46
Recursion	47
Growing Functions	50
Functions and Side Effects	52
Summary	52
Exercises	53
Minimum	53
Recursion	53
Bean Counting	53

4 DATA STRUCTURES: OBJECTS AND ARRAYS 57

The Weresquirrel	58
Datasets	58
Properties	59
Methods	60
Objects	60
Mutability	63
The Lycanthrope's Log	64
Computing Correlation	65

Array Loops	67
The Final Analysis	67
Further Arrayology	69
Strings and Their Properties	70
Rest Parameters	72
The Math Object	73
Destructuring	74
Optional Property Access	75
JSON	75
Summary	76
Exercises	77
The Sum of a Range	77
Reversing an Array	77
A List	77
Deep Comparison	78

5 HIGHER-ORDER FUNCTIONS 81

Abstraction	82
Abstracting Repetition	82
Higher-Order Functions	84
Script Dataset	85
Filtering Arrays	86
Transforming with map	86
Summarizing with reduce	87
Composability	88
Strings and Character Codes	89
Recognizing Text	91
Summary	92
Exercises	92
Flattening	92
Your Own Loop	93
Everything	93
Dominant Writing Direction	93

6 THE SECRET LIFE OF OBJECTS 95

Abstract Data Types	95
Methods	96
Prototypes	97
Classes	98
Private Properties	100
Overriding Derived Properties	101
Maps	102
Polymorphism	104

Getters, Setters, and Statics	105
Symbols	106
The Iterator Interface	107
Inheritance	109
The instanceof Operator	110
Summary	111
Exercises	111
A Vector Type	111
Groups	112
Iterable Groups	112

7

PROJECT: A ROBOT **115**

Meadowfield	115
The Task	117
Persistent Data	118
Simulation	119
The Mail Truck's Route	121
Pathfinding	121
Exercises	123
Measuring a Robot	123
Robot Efficiency	124
Persistent Group	124

8

BUGS AND ERRORS **127**

Language	127
Strict Mode	128
Types	129
Testing	130
Debugging	131
Error Propagation	132
Exceptions	133
Cleaning Up After Exceptions	134
Selective Catching	136
Assertions	138
Summary	138
Exercises	139
Retry	139
The Locked Box	139

9

REGULAR EXPRESSIONS

141

Creating a Regular Expression	141
Testing for Matches	142
Sets of Characters	142
International Characters	144
Repeating Parts of a Pattern	145
Grouping Subexpressions	146
Matches and Groups	146
The Date Class	147
Boundaries and Look-Ahead	148
Choice Patterns	149
The Mechanics of Matching	149
Backtracking	150
The replace Method	151
Greed	153
Dynamically Creating RegExp Objects	154
The search Method	154
The lastIndex Property	155
Parsing an INI File	156
Code Units and Characters	158
Summary	159
Exercises	160
Regex Golf	160
Quoting Style	161
Numbers Again	161

10

MODULES

163

Modular Programs	164
ES Modules	164
Packages	166
CommonJS Modules	167
Building and Bundling	170
Module Design	170
Summary	172
Exercises	173
A Modular Robot	173
Roads Module	173
Circular Dependencies	173

11 ASYNCHRONOUS PROGRAMMING 175

Asynchronicity	176
Callbacks	177
Promises	178
Failure	180
Carla	181
Breaking In	182
async Functions	184
Generators	185
A Corvid Art Project	186
The Event Loop	189
Asynchronous Bugs	190
Summary	191
Exercises	191
Quiet Times	191
Real Promises	192
Building Promise.all	192

12 PROJECT: A PROGRAMMING LANGUAGE 195

Parsing	195
The Evaluator	199
Special Forms	200
The Environment	202
Functions	203
Compilation	204
Cheating	205
Exercises	205
Arrays	205
Closure	206
Comments	206
Fixing Scope	206

PART II BROWSER

13 JAVASCRIPT AND THE BROWSER 209

Networks and the Internet	209
The Web	211
HTML	211

HTML and JavaScript	213
In the Sandbox	214
Compatibility and the Browser Wars	215

14
THE DOCUMENT OBJECT MODEL **217**

Document Structure	217
Trees	218
The Standard	219
Moving Through the Tree	220
Finding Elements	221
Changing the Document	222
Creating Nodes	223
Attributes	224
Layout	225
Styling	227
Cascading Styles	228
Query Selectors	229
Positioning and Animating	230
Summary	232
Exercises	232
Build a Table	232
Elements by Tag Name	233
The Cat's Hat	233

15
HANDLING EVENTS **235**

Event Handlers	235
Events and DOM Nodes	236
Event Objects	237
Propagation	237
Default Actions	239
Key Events	239
Pointer Events	240
Mouse Clicks	241
Mouse Motion	242
Touch Events	243
Scroll Events	244
Focus Events	245
Load Event	246
Events and the Event Loop	246
Timers	247
Debouncing	248
Summary	249

Exercises	249
Balloon	249
Mouse Trail	249
Tabs	250

16

PROJECT: A PLATFORM GAME **253**

The Game	253
The Technology	254
Levels	255
Reading a Level	255
Actors	257
Drawing	260
Motion and Collision	265
Actor Updates	267
Tracking Keys	269
Running the Game	270
Exercises	272
Game Over	272
Pausing the Game	272
A Monster	272

17

DRAWING ON CANVAS **275**

SVG	276
The canvas Element	276
Lines and Surfaces	277
Paths	278
Curves	279
Drawing a Pie Chart	282
Text	283
Images	283
Transformation	285
Storing and Clearing Transformations	287
Back to the Game	288
Choosing a Graphics Interface	293
Summary	294
Exercises	294
Shapes	294
The Pie Chart	295
A Bouncing Ball	295
Precomputed Mirroring	295

18	HTTP AND FORMS	297
	The Protocol	297
	Browsers and HTTP	299
	Fetch	300
	HTTP Sandboxing	302
	Appreciating HTTP	302
	Security and HTTPS	303
	Form Fields	303
	Focus	305
	Disabled Fields	306
	The Form as a Whole	306
	Text Fields	307
	Checkboxes and Radio Buttons	309
	Select Fields	310
	File Fields	311
	Storing Data Client-Side	312
	Summary	314
	Exercises	315
	Content Negotiation	315
	A JavaScript Workbench	315
	Conway's Game of Life	315

19	PROJECT: A PIXEL ART EDITOR	319
	Components	320
	The State	321
	DOM Building	322
	The Canvas	323
	The Application	325
	Drawing Tools	327
	Saving and Loading	330
	Undo History	332
	Let's Draw	333
	Why Is This So Hard?	334
	Exercises	335
	Keyboard Bindings	335
	Efficient Drawing	335
	Circles	336
	Proper Lines	336

PART III NODE

20 NODE.JS

339

Background	339
The node Command	340
Modules	341
Installing with NPM	342
Package Files	342
Versions	343
The Filesystem Module	344
The HTTP Module	345
Streams	346
A File Server	347
Summary	352
Exercises	353
Search Tool	353
Directory Creation	353
A Public Space on the Web	353

21 PROJECT: SKILL-SHARING WEBSITE

355

Design	356
Long Polling	356
HTTP Interface	357
The Server	359
Routing	359
Serving Files	360
Talks as Resources	362
Long Polling Support	364
The Client	365
HTML	365
Actions	366
Rendering Components	367
Polling	369
The Application	370
Exercises	371
Disk Persistence	371
Comment Field Resets	371

22		
JAVASCRIPT AND PERFORMANCE		373
Staged Compilation	374	
Graph Layout	374	
Defining a Graph	376	
Force-Directed Layout	377	
Avoiding Work	380	
Profiling	381	
Function Inlining	383	
Dynamic Types	384	
Summary	385	
Exercises	386	
Prime Numbers	386	
Faster Prime Numbers	386	
APPENDIX: EXERCISE HINTS		387
INDEX		409
