

CONTENTS IN DETAIL

ACKNOWLEDGMENTS	xix
INTRODUCTION	xxi
The Power of Coding	xxii
Why Kotlin?	xxii
Who Is This Book For?	xxiii
What's in This Book?	xxiv
The Projects	xxvi
Getting Started	xxx
Resources	xxx
PART I: PROGRAMMING FUNDAMENTALS	1
1 KOTLIN BASICS	3
Using Comments	4
Variables	5
Constants	6
Common Data Types	7
Operators	10
Arithmetic	10
Assignment	12
Unary	12
Relational	12
Logical	13
Working with Strings	14
Concatenation	14
String Templates	15
Escape Sequences	16
Null and Nullable Types	17
Flow Control	18
Conditional Statements	18
Loops	22
Functions	27
Built-in Mathematical Functions	28
Custom Functions	29
Scope Functions	34
Lambda Expressions	35
Basic Input and Output	37
Console-Based Input and Output	37
Simple File Operations	39
Project 1: Build a Console-Based Calculator	40
The Code	41
The Result	44

Summary	45
Resource	45
2 ARRAYS, COLLECTIONS, AND CLASSES	47
Arrays	48
Primitive Arrays	49
The Array Constructor	49
Array Operations	50
Multidimensional Arrays	51
Collections	52
Lists	52
Sets	54
Maps	56
An Introduction to Classes	57
Constructors	58
The init Block	61
Methods	62
Encapsulation	63
The this Keyword	64
Inheritance and Polymorphism	65
Common Classes and Custom Types	67
Data Classes	68
Pairs and Triples	70
Abstract Classes	71
Interfaces	72
Enum Classes	74
Copying Objects	75
Shallow Copy	75
Deep Copy	76
Project 2: Build a Versatile Task Manager	78
The Code	78
The Result	84
Summary	85
Resource	86
3 VISUALIZING WITH JAVAFX	87
Data Visualization Tools for Kotlin	88
An Overview of JavaFX	89
Key Functionalities	89
Setup	90
Project 3: Build “Hello, World!” in JavaFX	90
The Code	92
The Result	95
The JavaFX Object Hierarchy	96
The Stage	96
Scenes	96
Layout Containers	97
Child Nodes	98

Creating JavaFX Charts	98
Project 4: Visualize Data as a Bar Chart	99
The Code	99
The Result	101
Project 5: Create a Multiseries Line Chart	102
The Code	103
The Result	105
Drawing with the Canvas	107
A Simple Shape	107
Common Graphics Context Methods	109
Project 6: Draw a Spiral Seashell	110
The Strategy	110
The Code	111
The Result	115
Animation in JavaFX	115
Project 7: Animate a Square	116
The Code	116
The Result	117
Project 8: Animate a Bouncing Ball	118
Setting Keyframes Explicitly	118
Using an Action Event Listener	120
Summary	124
Resources	124

PART II: APPLICATIONS IN MATH AND SCIENCE 125

4 SOLVING MATHEMATICAL PROBLEMS WITH CODE	127
Project 9: Find the Square Root with the Babylonian Algorithm	128
The Code	129
The Result	130
Project 10: Create Pythagorean Triples with Euclid's Formula	130
The Code	131
The Result	132
Project 11: Identify Prime Numbers with the Sieve of Eratosthenes	133
The Strategy	133
The Code	134
The Result	135
Project 12: Calculate Earth's Circumference the Ancient Way	136
The Code	138
The Result	139
Project 13: Code the Fibonacci Sequence	139
The Golden Ratio	141
The Fibonacci Spiral	141
The Code	143
The Result	147
Project 14: Find the Shortest Distance Between Two Locations on Earth	148
The Code	150
The Result	153

Project 15: Do Encryption with the Hill Cipher	154
How It Works	154
The Code	157
The Result	163
Project 16: Simulate a One-Dimensional Random Walk	164
A One-Dimensional Model	165
The Code	166
The Result	170
Summary	173
Resources	174

5 MODELING AND SIMULATION **175**

Project 17: Predict the Flight of a Cannonball.....	175
The Strategy	178
The Code	179
The Result	181
Project 18: Design a Fountain with Water Jets	182
The Strategy	184
The Code	184
The Result	188
Project 19: Track a Pendulum's Motion and Phase	189
The Motion of a Simple Pendulum	190
The Strategy	191
The Code	192
The Result	197
Project 20: The Physics of Coffee Cooling.....	200
Newton's Law of Cooling	200
The Effect of Mixing Liquids	201
The Strategy	201
The Code	202
Project 21: Simulate a Binary Star System.....	209
The Science of Binary Star Systems	210
The Strategy	211
The Code	212
The Result	220
Summary	221
Resources	221

PART III: RECURSION, SORTING, AND SEARCHING **223**

6 RECURSIVE FUNCTIONS AND FRACTALS 225	
The Concept of Fractals	226
Recursive Functions	227

Project 22: The “Hello, World!” of Fractals.....	229
The Strategy.....	230
The Code.....	231
Project 23: Draw the Sierpiński Triangle.....	234
The Strategy.....	235
The Code.....	236
Project 24: Create a Fractal Tree	239
The Strategy.....	239
The Code.....	240
The L-System and Turtle Graphics	241
Formalizing the L-System	242
Drawing L-System Patterns with Turtle Graphics.....	243
Project 25: Design an L-System Simulator	245
The Code.....	245
The Result.....	251
The Mighty Mandelbrot Set	252
Project 26: Code and Visualize the Mandelbrot Set	254
The Code.....	255
The Result.....	259
Summary	262
Resources	262

7 SORTING AND SEARCHING **265**

Sorting Algorithms	266
Project 27: Space-Efficient Sorting with Insertion Sort.....	268
The Code.....	269
The Result.....	270
Project 28: Faster Sorting with Merge Sort.....	270
The Code.....	271
The Result.....	273
Project 29: High-Efficiency Sorting with Quick Sort.....	274
The Code.....	275
The Result.....	277
Search Algorithms	278
What Is a Graph?.....	278
How to Search a Graph.....	279
Project 30: Stack-Based Searching with Depth-First Search.....	280
The Code.....	281
The Result.....	282
Project 31: Queue-Based Searching with Breadth-First Search	284
The Code.....	285
The Result.....	286
Project 32: Heuristic Searching with A*	288
The Heuristic Function	289
The Algorithm.....	291
The Code.....	292
The Result.....	298
Summary	300
Resources	301

PART IV: OPTIMIZATION WITH NATURE-INSPIRED ALGORITHMS

303

8

THE GENETIC ALGORITHM

305

Nature-Inspired Algorithms	306
The Optimization Problem	306
When to Use NIAs	310
An Overview of the Genetic Algorithm	310
Genetic Operators	311
Selection	312
Crossover	314
Mutation	315
Elitism	315
Project 33: Evolve Gibberish into Shakespeare.	316
The Strategy	316
The Code	316
The Result	321
Project 34: Solve the Knapsack Problem	323
The Strategy	323
The Code	324
The Result	330
Project 35: Optimize a Multivariate Function with the Genetic Algorithm	332
The Strategy	333
The Code	333
The Result	338
Stopping Condition for Genetic Algorithms	341
Summary	343
Resources	343

9

AGENT-BASED ALGORITHMS

345

An Overview of Particle Swarm Optimization	346
Implementing PSO for Function Minimization	348
Project 36: Optimize a Multivariate Function with a Particle Swarm	350
The Code	350
The Result	354
Ant Colony Optimization	356
The ACS Algorithm	358
Symbols and Their Meanings	358
The Steps of ACS	359
Project 37: Solve the Traveling Salesman Problem with an Ant Colony System	361
The Code	361
The Result	373
Summary	376
Resources	376

AFTERWORD	379
------------------	------------

APPENDIX	381
-----------------	------------

Key Definitions	381
Workflow for Creating an App	383
Setting Up Shop	384
Step 1: Download and Install IntelliJ IDEA	384
Step 2: Download and Set Up the JDK	385
Step 3: Create a New Project	385

INDEX	000
